

540W solar panels

Overview

ZXM7 guarantees the highest power output. PERC technology and potent anti reflective coating result in 21.13% module efficiency. This is significantly higher than average, which will result in substantial extra savi. The heat is less of a problem with this module: with one of the industry's lowest temperature. ZXM7 receives multiple quality checks throughout the manufacturing process and is subject to stringent quality and reliability testing. The manufacturing facilities are highly automated. ZnShine Solar guarantees limited degradation over the ensuing 30 years. The performance will only degrade by a maximum of 2% the first year, and then only by a maxim. This model's construction makes it perfect for both residential and business rooftops. Durability and strength are increased by using a strong, robust frame built from anodized alumin.
