

Install a small split solar power supply in the yard

Overview

The frame of your solar ground mount will be 2" or 3" Schedule 40 Steel Pipe. We went for the 3" due to the size of our mount. You can either. Before I get too ecstatic about these cells, we have to talk about the buying experience on Alibaba. In a word: "sketch city." Things started out ok. The conversations I had with. With the frame in place, it was time to install the other IronRidge pieces. Their rails are the centerpiece of the system - we went with the XR1000 which is rated for heavy loads and high winds. Since our panels were 6 across and 5 down, we needed 12 rails (one on. At this point, you've built out the base of your system. We'll look at solar chargers and additional inverter connections in a minute, but now's the time to boot up the system for the first time, and see how things are working. Here's the order. 1. Plug in the Outputs wire.
