

Self-use solar panel roof

Overview

There are numerous pros to installing your own solar panels. To make them easier to digest, we've broken down the key points below for you to review. Now that you know why solar panels are such a good idea, we're sure you're eager to purchase your own. Don't rush to the stores (or your laptop) just yet — there are some key considerations to make first. You don't want to invest in technology that doesn't meet your electricity generation needs or install the incorrect equipment. Consider the following. Now let's get into the nitty gritty: installation! When it comes to installation, rigid solar panels are somewhat similar between brands. But there are some unique differences. This step-by-step guide is a generalized approach, but it should still apply to your installation. It isn't as complicated as you may think, so let's get into it already. In most cases, no, you do not need to apply for planning permission to install solar panels on your roof. Typically, it's considered permitted development and shouldn't affect neighbors in any meaningful way. After all, you aren't expanding your property. You're just adding to what's already there. However, some exemptions to this may apply depending on the location. Installing solar panels on your roof can seem like a huge undertaking, but it can prove highly worthwhile. Not only do you get energy independence, but you also do your part for the environment and save money on utility bills in the long run. Consider purchasing your own solar panels today and see for yourself why so many people and businesses are.
